

**CONSTRUCTING  
EXCELLENCE**  
IN YORKSHIRE & HUMBER

# Awards 2016

## Entry Information

Thank you for your interest in the Constructing Excellence in Yorkshire and Humber Awards 2016

Held each year in July, the CEYH awards are a celebration of everything the regional construction sector has achieved over the last twelve months and rewards the organisations, teams and individuals who are truly pushing our sector forward.

This year our awards will be returning to Leeds on 1st July 2016 and to celebrate we have arranged a special "Swinging from the Rooftops" theme awards presentation with cocktails, dancing and live music from our four piece swing band. In addition, we can promise you our usual mix of excellent hosting, gourmet food and drink interspersed with our professional awards ceremony making this the showpiece event of the regional construction calendar.

Organised by a dynamic and forward thinking team, our awards continue to break records, elevating the profile of the companies involved and highlighting Yorkshire and Humber as a key regional hub for construction innovation and enterprise. This event is a great opportunity for companies who wish to be seen as proactively leading positive change within the built environment.

Please peruse our brochure, we are sure there is a category for you! We look forward to reading your submissions.

## Tom Oulton | Chair | Constructing Excellence Yorkshire and Humber

*"The awards were a wonderful occasion to celebrate the great projects and innovation spearheaded in Yorkshire and Humber. AtlasCloud were delighted to play our part as sponsor and to celebrate alongside our clients, partners and prospects"*

**Pete Watson | CEO | AtlasCloud (2015 Headline Sponsor)**

### 2016 Award Categories

Achiever of the Year – Sponsored by Lovell

**LOVELL**

BIM Project of the Year – Sponsored by Trimble Tekla

Trimble  
**Tekla**

Client of the Year – Sponsored by Addleshaw Goddard

**ADDLESHAW  
GODDARD**

Health and Safety – Sponsored by Turner & Townsend

**Turner & Townsend**

Heritage – SPONSORSHIP OPPORTUNITY

Innovation – Sponsored by Bay Construct

**Bay Construct**

Integration & Collaborative Working – SPONSORSHIP OPPORTUNITY

Leadership & People Development – Sponsored by Kier

**KIER**

Project of the Year – Sponsored by Gosschalks

**GOSSCHALKS**  
CONSTRUCTION LAW SPECIALISTS

SME of the Year – Sponsored by YORhub

**YORhub**  
CONSTRUCTION FRAMEWORKS FOR YORKSHIRE & HUMBER

Sustainability – Sponsored by Costain

**COSTAIN**

Value – SPONSORSHIP OPPORTUNITY

Young Achiever of the Year – Sponsored by Carillion Morgan Sindall Joint Venture

**A1L2B**  
MORGAN  
SINDALL

Best of the Best – Sponsored by YHCE

**CONSTRUCTING  
EXCELLENCE**  
Yorkshire and Humber Club

### Our drinks reception sponsor

## Entry Guidelines

Winners are selected across 13 different categories each representing the core themes underlying the Constructing Excellence change agenda, including innovation, value & sustainability. We also award a best of the best category on the night meaning that your organisation could win two accolades for the price of one entry. The winners of each category then go on to compete at the national Constructing Excellence Awards, held in London in autumn. Help us ensure Yorkshire and Humber are well represented!

### Qualifying

The industry is defined as all who commission, produce, develop, plan, design, build, alter or maintain the built environment.

The company / organisation or project(s) must demonstrate improvements in line with Constructing Excellence principles and the Rethinking Construction agenda.

An application can be made for a project, process, a product or a service (a separate application form MUST be completed for each category).

Organisations are allowed and in fact encouraged to submit multiple entries for multiple categories

Demonstrating excellence in practice; where evidence is requested there should be a clear "audit" trail available for qualitative and quantitative data

Where a project or project leader is the subject the project should have been based in Yorkshire & Humber and you must have the approval of the owner of the building/project

Where an individual, process, product or service is the subject, the nominating organisation/divisional office/individual should be based in Yorkshire & Humber

All nominations and submissions should relate primarily to work carried out between January 2015 and December 2015.

### How to enter - Entry Guidelines

- All submissions must be made by midnight on Friday 29th April 2016.
- All entries should be submitted electronically, via email to [ceyhawards@leedsbeckett.ac.uk](mailto:ceyhawards@leedsbeckett.ac.uk)
- Please include with your submissions the project logos (JPEG format) for ALL organisations involved in the project logos.
- Please include a selection of photos that we may use should you be shortlisted (MUST be high resolution)
- All entries WILL receive a receipt confirmation via email. If you have submitted an entry and not received a receipt email please contact us on 0113 812 1902 to check we have received your submission.
- We reserve the right to move entries into other categories if we feel they are more appropriate.

### Specific Entry Consideration

- Clients must be made aware in advance of any entries that refer to them and the judges may require evidence of client endorsement.
- Membership of Constructing Excellence or a Constructing Excellence Club is not a requirement of entry.
- The organisers reserve the right to feature / display submitted material in any editorial or promotional work related to the award scheme.
- A précis of shortlisted entries will feature on the CEYH website and elsewhere. Shortlisted entrants may be asked to participate in Constructing Excellence related events or programme of seminars and case history presentations.
- No materials will be returned.
- Every project entered will be considered for Demonstration Project status.

### Judging

- The panel of judges will consider each submission against the category criteria.

- Winners will be announced at the Yorkshire & Humber Constructing Excellence Awards on Friday 1st July 2016
- All awards are made at the discretion of the judges and Constructing Excellence in Yorkshire and Humber.
- The right is reserved not to make awards in a particular category.
- The judges reserve the right to refuse entries without giving reasons.
- The judges have authority to move entries into more applicable categories. Their decision is final and no correspondence will be entered into following the Awards.
- Information supplied by the judges, or discussed between the judges and entrants will be treated in complete confidence, and confidentiality on the part of the entrants if requested.

## 2016 Award Categories

### Achiever of the Year

## LOVELL

This award recognises outstanding performance or influence by an individual who has been inspirational in the opinion of the sector peer group during 2015. The winner's exemplary actions will have changed the behaviour and performance of others and delivered disproportionate benefits for, and left a legacy in, the outputs of the built environment sector. The award winner will naturally show all the hallmarks championed by Constructing Excellence, such as best practice and a wholehearted commitment to the Rethinking Construction principles and the Construction 2025 agenda. The key is that this commitment needs to be visible – i.e. adopted and adapted to make a real difference within the sphere of the applicant's own operation, influence and community. The character of the nominee is crucial – we are looking for leaders, opinion formers and champions of change. Submissions from third parties are encouraged and this is an award open to individuals of any age, discipline, or sector.

### BIM Project of the Year

This category is looking for companies or projects that are using digital processes (Building Information Modelling) to dramatically improve the design, delivery and operation of built assets. Judges are particularly looking for teams who can demonstrate the effective use and benefits of integrated and interoperable BIM solutions that reduce cost, time, and/or risk to the benefit of the client and others without detriment to others.

Projects may be in the advanced stages of design, under construction or in full operation. Submissions should highlight how the adoption of collaborative digital processes have dramatically improved planning, design, fabrication, construction and/or operation of built facilities or infrastructure. Entries should demonstrate the use of

best practice or new forms of collaboration or partnering, information sharing, innovative new tools/methods and processes, and should describe how these have/will deliver a wide variety of stakeholder benefits over the lifecycle of the asset. \* This project has to be worked on in your local region, however, the project doesn't necessarily have to be based within your region. \*

### Client of the Year

Judges are looking for a construction client that has shown clear consistent leadership and commitment to core Constructing Excellence principles on one or preferably several projects. These principles include collaborative working, integration, fair terms and forms of contract, procurement on value, prompt payment, clear and considered project briefs and health and safety set as a key driver. Clients who have been actively involved to encourage and reward excellence, and embraced the goals within Construction 2025 will be acknowledged for their leadership.

Submissions from third parties are encouraged but must include endorsement from the client themselves.

### Health and Safety

The judges will be looking for a project, organisation or initiative where health and safety has been driven way beyond what is required by the duties stated in the CDM Regulations. The winner will demonstrate both leadership and innovation in consideration of project Health and Safety at either pre-construction or construction phases to produce new schemes, tools, processes or actions that safeguard against ill health and/or injury. The judges will look at entrants' overarching health and safety management systems, consideration of health and safety during the design phase and clear demonstration of sustainable and effective risk management.

# CONSTRUCTING EXCELLENCE IN YORKSHIRE & HUMBER

## Heritage

Judges will be looking to recognise the achievement of high standards in the repair, re-use and revitalisation of the region's historic buildings, sites and places. Entries should demonstrate evidence of research and investigation into traditional methods and materials encountered, evaluations of alternative options, choice of appropriate procurement route, application of well-considered and sympathetic technical solutions (whether traditional or innovative), delivery of quality and enduring outcomes, and a commitment to the development of heritage skills and training opportunities.

## Innovation

Judges will be looking for the best organisation or project that took the most innovative approach to overcome site or project specific challenges, harnessed emerging technologies or market opportunities, or developed a new/improved product or service - perhaps innovative use of ICT solutions, BIM, LEAN, environmental technologies, process innovation, new materials or offsite or modular construction. Judges will particularly look for evidence of how the innovation can be used/applied elsewhere in the organisation or on other projects. Entries should show how they defined the challenge, identified possible solutions, and secured agreement from key stakeholders. Winners will have focused on the occupier/users needs, demonstrated improvements compared to previous or third party performance and/or shown how the approach has led to winning new work.

## Integration and Collaborative Working

Judges will be looking for evidence of early involvement, selection by value, common processes and tools across organisations such as BIM, long term relationships, modern commercial arrangements and fair payment practices. Obvious benefits will include a less adversarial approach and use of an appropriate contract to ensure this, but judges will assess delivery on results achieved against client set measurement results and how workforce development has led to improved products or services and customer satisfaction. Successful entries will have succeeded in integrating their teams to such a level that they appear as a single entity to the customer. Joint submissions are strongly encouraged.

## Leadership and People Development

The winner in this category will best define and demonstrate improvements resulting from targeted leadership

development and training across the workforce and perhaps local community. Whether driven by strategic leadership of an enlightened client or a supplier, entries should show and win particular respect from the workforce and/or community through workforce development, skills and training, equality and diversity initiatives, and improvements to health and safety and the working environment.

Evidence of how the organisation's leadership development strategy is aligned with Construction 2025 will be taken into account.

## Project of the Year

Judges are looking for an outstanding project that best demonstrates the highest levels of technical achievement, innovation, application of best practice, teamworking throughout the supply chain, delivered to time, budget and quality with the highest health & safety standards, lowest environmental impact and most importantly to the customer's delight. It is just as likely to be an outstanding local project as it is a high profile landmark – but the winner will be a project that all parties involved will be proud to have been part of.

## SME of the Year

This Award specifically recognises the challenges and outstanding achievements of Small to Medium Enterprises, particularly those who have made strides in improving their company through implementing best practice. Judges will be looking for companies that intentionally focus on people development, customer satisfaction, industry best practice, performance management, and/or new ways of collaborative working. Entrants and nominees will be required to demonstrate a commitment to sustainability and health and safety; describing the steps that have been taken to improve performance in this area through the 4 Cs of co-operation, communication, competence and commitment. (Small to Medium-sized Enterprises (SME): less than 250 employees and turnover less than Euro 50 million or a balance sheet less than Euro 43 million.)

## Sustainability

The judges will be looking for a project or organisation where the principles of sustainability have been fully embedded, particularly those that demonstrate creative and/or innovative thinking and leadership. The winner will be an exemplar where sustainability is central; providing hard evidence that effective management of environment, social

and economic aspects has achieved a significant and tangible improvement in performance. The judges will give preference to entrants that demonstrate that a responsible long term and collaborative approach has been taken to add value and achieve a range of net benefits for themselves and others.

### Value

Value can be define as the intrinsic worth of good, service or product and the judges in this category will be evaluating the impact that your project has upon the users, the built environment and the wider community in conjunction with the financial aspects of the scheme.

The judges will be looking for either a project on which long-term value has been best achieved, or an organisation that has realised value on a number of projects over a period of time. The whole life cost implications of the project will have been a consideration from the outset, combining capital costs of constructing the facility with maintenance, operational and occupational costs. Forethought for 'end of life' will also factor. Importantly the operational needs of the owners and users will have been a key driver throughout the design and construction process with excellence in occupation the ultimate goal. Entrants should be able to describe the balance of expenditure between design, construction and operation in relation to whole live cost/value and provide evidence or forecasts for uplifts in operational outcomes.

### Young Achiever of the Year

This award looks to recognise a young achiever in our industry. The judges are looking for the person that has best demonstrated a positive impact against the current G4C (Generation for Change) priority areas of people, sustainability and asset outcomes. The award is open to a person with less

than ten years of experience in the construction and built environment sector. When nominating someone consider the impact they have had on you, their organisation and their role in key projects, but also consider that person's potential. Nominations can be made from individual companies, colleges, universities, institutes and institutions.

### Best of the Best

This prize is awarded on the night to the project which the judges feel best exemplifies the principles of Constructing Excellence in the region. This award is sponsored by Yorkshire and Humber Constructing Excellence Club.

## Key Dates

### Closing Date For Entries

Friday 29th April 2016

### Shortlist Announced

Friday 20th May 2016

### Gala Awards Ceremony Evening

Friday 1st July 2016

18:30 start.

*To apply, please download application forms from [www.ckegroup.org/cexcellenceyh/ceyh-awards-2016/](http://www.ckegroup.org/cexcellenceyh/ceyh-awards-2016/)*
